TABLET FOR TABLE SERVICE

RESTAURANT

ReflectionPOS®

INCREASE PRODUCTIVITY

- Avoid the service delays staff experience while waiting in line to enter an order at the POS terminal by taking orders at the table.
- Add the ability to take table-side payments to boost your table turnover rate.

IMPROVE SERVER ACCURACY

- Eliminate mistakes and streamline food and drink prep by sending orders directly from the table to the kitchen or bar.
- Enhance your customers' experience with the ability to look up pricing, ingredient, and product availability information right on the floor.

MAXIMIZE THE BOTTOM LINE

- Generate new revenue streams for your restaurant by using Tablet POS to add outdoor seating or curb-side pickup.
- Increase ticket averages with the ability to prompt staff to up-sell or cross-sell at the point of order.

The Reflection POS® Tablet is a portable point of sale terminal that can be used to take orders and payments right on the dining room floor. Servers are instantly more efficienct, resulting in faster service for your customers. The tablet runs the same software as the POS terminals, providing a seamless integration for staff. Reflection POS® Tablets enable restaurateurs to provide fast and accurate service, resulting in an enjoyable dining experience for your patrons.
